

C.B.T. Computer Based Training (part 1 of 2)

I.A.L.A. System of Buoyage

C.B.T.

This program has three main sections starting with an introduction to the I.A.L.A. system, followed by a guide to recognition of the different marks, and an easy to use exercise that evaluates the learner's understanding of how to navigate within the system.

Using structured, interactive training techniques, this program provides students with a firm understanding of the I.A.L.A. System of Buoyage to enhance navigational safety. It can be used to introduce new seafarers to the system or as a refresher course to polish existing skills.

Through immediate, positive feedback, the user learns to identify the I.A.L.A. system of lights and buoys and reinforce their knowledge in a learner-friendly, self-paced environment. A scoring system enables them to monitor their progress.

Students test their new knowledge from a 'virtual bridge' perspective which requires them to identify the buoys and lights and take appropriate and timely action.

Together with the iTEST, available separately, this computer-based learning program is an effective resource for the competence development of seafarers.

Price: £100.00*

Discounts available when purchased as part of a Walport Safety Case

Dangerous Goods by Sea - IMDG Code' - CBT with Competency Test.

These CBT Modules provide everyone involved in all aspects of Shipping and Carriage of Dangerous Goods by Sea with essential information to ensure that Dangerous Goods are carried on board Ships with safety. Contains detailed information and instruction on : Classification of Dangerous Goods - IMDG Code Dangerous Goods List - Packing and Tank Provision - Consignment Procedures - Construction and Testing of Packagings - Intermediate Bulk Containers (IBC's) - Large Packagings - Portable tanks and Road Tank Vehicles - Stowage and Segregation - Waste - Emergency Procedures (EmS) - Medical First Aid Guide (MFAG) - Reporting Procedures - Packing Cargo Transport Units - Use of Pesticides in Ships - INF Code

Self Teach (work through) sessions with Self Assessment Questions & Exercises - Trainees are informed whether their answers are correct or wrong, and correct answers then provided. Results are provided as a percentage for each session.

Menu Mode - Access to all information by use of menus

Questions - a comprehensive selection of questions on ALL aspects of shipping Dangerous Goods and knowledge of the IMDG code. Answers are recorded to disc and a log generated for each trainees answers and percentage achieved

Price: £275.00*

Fire Safety For Ships

C.B.T.

It is intended to support practical training exercises whether conducted in a fire fighting training facility or on board ship, and is designed so that it can be used by instructors as a teaching / learning aid, or by individuals as a self-paced learning tool.

The program is easily modified to be ship specific satisfying the new requirements of SOLAS Chapter II-2 for on board fire fighting training manuals.

This versatile learning aid is suitable for multiple users, having a log in facility, progress report, final assessment, and administration access. It can be linked to the iTEST for more comprehensive evaluation and record keeping.

The program provides an average of 4 learning hours.

New! Self-Running Edition is now available.

Price: £300.00*

Discounts available when purchased as part of a Walport Safety Case

* Postage/Shipping costs to be added.

C.B.T. Computer Based Training (part 2 of 2)

Ship Security Officer

C.B.T.

The purpose of this interactive learning programme is to provide knowledge to those who may be designated to perform the duties and responsibilities of a SHIP SECURITY OFFICER (SSO) as defined in PART A SECTION 2.1.6 and SECTION 12 of the ISPS CODE, in accordance with IMO MODEL COURSE 3.19.

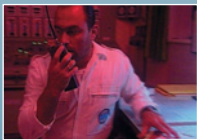

It is intended to support practical training exercises whether conducted in a training facility or on board ship. It is designed so that it can be used by instructors as a teaching/learning aid, or by individuals as a self paced learning tool.

This versatile learning aid is suitable for multiple users, having a log in facility, progress report, final assessment and administration access. It can be linked to the iTEST for more comprehensive evaluation and record keeping.

The programme provides an average of 3 LEARNING HOURS.

Price: £250.00*

Discounts available when purchased as part of a WALPORT safety package.

Personal Sea Survival

C.B.T.

This course is intended to support practical training exercises whether conducted in a sea survival training facility or on board ship, and is designed so that it can be used by instructors as a learning aid, or by an individual as a self paced learning tool.

Price: £300.00*

Discounts available when purchased as part of a Walport training package.

Interactive Training Evaluation System Tool.

iTEST

The iTEST is a versatile computer based assessment tool for evaluating the knowledge and understanding of personnel in any particular subject, or combination of subjects relevant to a specific job function.

- Results are presented in a format that is easy to interpret and analyse.
- Training records and needs can be entered for each candidate.
- A Test Manager facility allows the Administrator freedom to create tests specific to their own requirements.
- Question modules are currently being developed and these will be available online as they are produced.
- Company, ship, or task specific questions can be designed and compiled by IDESS upon request.

Price on application

Question Generator

C.B.T.

A simple to use tool allowing the iTEST administrator to compile a question database specific to their operational needs.

£500.00*
